Recipe button settings

- OptiMe
- OptiMe with Fresh Milk option

Content

- 1. Basics
- 2. How to program a recipe button
- 3. How the change a recipe name

1. Basics

This document describes you how to program your drinks on the different positions and screens.

- A drink can be programmed more than ones on different positons.
- A existing drink can <u>NOT</u> be moved from one position to another, reason: when programming a recipe on the desired position its always a basic Animo recipe from the memory.
- There is a maximum of 3 screens to program.
 Each screen contains a maximum of 8 drink positions.
 - If there are (e.g.) 12 drink selections programmed, only 2 screens are active.
 - If there are (e.g.) 20 drink selections programmed, 3 screens are active.
- The recipes that are factory-set can be found in the recipes settings document which can be downloaded from below link:

 OptiMe Freshmilk http://tinyurl.com/y3c3feld
 OptiMe http://tinyurl.com/y3h9zdsp
- Instead of a RECIPE, a Free Vend PIN can be programmed. Use this Free Vend PIN to switch the touch panel on the free vend when a payment system is active.

| ANIMO | MAKE YOU! | MAKE YOUR CHOICE | | |
|------------|-----------|------------------|----|-----------|
| / 9 | 10 | 11 | 12 | \rangle |
| 13 | 14 | 15 | 16 | |

Sceen 3

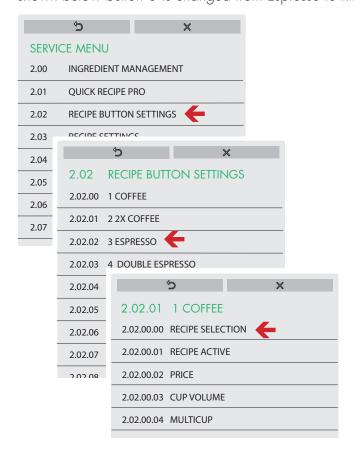

| $\left\langle \begin{array}{ccccc} 17 & 18 & 19 & 20 \\ 21 & 22 & 23 & 24 \end{array} \right\rangle$ | ANIM | | MAKE YOU! | R CHOICE | 10:1 | 10 |
|--|------|----|-----------|----------|------|-----------|
| 21 22 23 24 | (| 17 | 18 | 19 | 20 | \rangle |
| | | 21 | 22 | 23 | 24 | |

2. How to program a recipe button

Every machine contains preprogrammed basic recipes. Each key can be changed if required. In the example shown below button 3 is changed from Espresso to Ristretto.

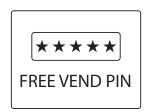

- 1. Navigate to the service menu item shown above.
- 2. Select RECIPE BUTTON SETTINGS / 3 ESPRESSO / BUTTON
- 3. Select the required recipe in the preprogrammed recipe list and press OK.
 - The <u>black</u> and <u>grey</u> texts show the recipes that are available in the machine.
 - The recipes in <u>black</u> texts are active (buttons are visible in the display).
 - The recipes in grey texts are not active.
 To activate, go to RECIPE ACTIVE, and select YES.
 - A drink can only be programmed on button position 1 till 24.

Instead of a RECIPE, a Free Vend PIN can be programmed. Use this Free Vend PIN to switch the touch panel on the free vend when a payment system is active.

example; OptiMe 22 Fresh Milk

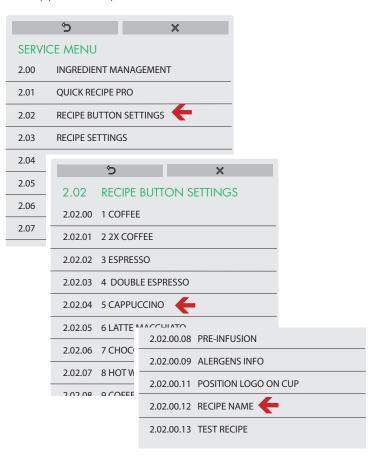

3. How to change a recipe name

Its possible to change the recipe name of a drink.

In below example the Cappuccino recipe name is changed in Cappuccino Special

- Enter the Service menu and navigate to 2.02.04.12 RECIPE NAME
- 2. Select Name Selection

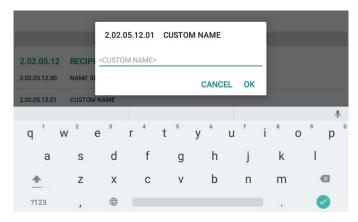

2019/01 Rev. 0.0

3. A keyboard appears.

Type in your new drink name.

There are two solutions if the name is to long:

- Cappuccino#Special -> use a hashtag (#) and <u>no</u> spaces between the words.
 The text will looks like example A
- Cappuccino Special -> when only a space is used (no hashtag #) between the words the text is a running text, see example B.
- If you want to use capital letters (fast) double click the shift button twice $\stackrel{\bullet}{\bullet}$.
- 4. After confirming the new recipe name select Custom and confirm with OK.

The Default recipe name always stay in the program.
