

With only the touch of a finger, the MT-line coffee brewer is activated. In the stainless steel boiler, water is quickly heated up to the exact right temperature. Once it starts to pour and is sent through the ground coffee, the magic happens. The smell of fresh filter coffee is released.

BENEFITS

MANUAL FILLING / WATER CONNECTION

- + The semi-automatic machines are equipped with a manual filling point on the front. This enables you to fill the machines easily.
- + The water reservoir can hold 2.7 litres.
- + Automatic machines are equipped with a water connection.

UNIQUE JUG DETECTOR

- + A jug detector starts and stops the brewing process.
- + The leak stop option closes the filter basket, preventing dripping after the jug has been removed.
- + The machine gives an audio alert when the coffee is ready.

EVERYTHING IS POSSIBLE

- + MT-Line equipment is also available with a hot water tap for making tea, hot chocolate, soup and more.
- + The MT100v and MT200v are adjustable in height, suitable for the 2.4 litre thermos container, the 2.1 litre thermos jug with pump, as well as the 1.85 thermos jug.

EASY TO USE

- + The convenient touch control buttons at the top of the machine ensure ease of operation.
- + The number of cups of coffee can be pre-set in our automatic machines by using the touch control buttons.
- + Descale indicator
- + Pre-wet brew possible
